

STARPOINT VRS-F-M8-M30 with hexagon extension with C up to 300 mm

Artikel-Nr: 8600620

Problem:

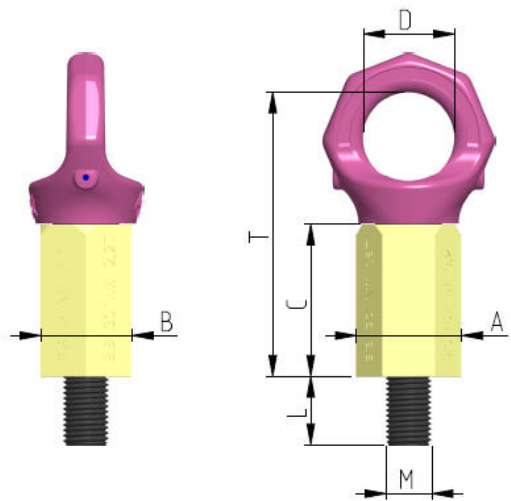

Obstacles (f.e. brackets, hydraulic pipes) which are located between the lifting point and the suspension ring of the chain sling.

Solution: Distance for the extension

- Hexagon, suitable for the tightening with a flat spanner
- Selectively, bolting and tightening can be done by using either the Starpoint key or the flat spanner.
- The Working Load Limit (WLL) at loading directions deviant from the axial direction, are reduced as a function of extension height and thread connection, see user instruction.

STARPOINT VRS-F-M8-M30 with hexagon extension with C up to 300 mm
