

HOSE HALTERS™

Help protect your workers from injury and your equipment from damage

When pipe or hose couplings fail under pressure, *Lift-All Hose Halters* minimize thrashing to reduce equipment damage and personal injury. Slide the rubber grommets to keep choked eyes snug on the hose. The standard lengths will accommodate pipes and hoses with inside diameters (ID) of 1/4" up to 6".

Available in Four Different Strengths

Features and Benefits

- Suitable for pneumatic, water, hydraulic pipes and hoses.
- Made from strong, flexible nylon webbing.
- Easy to install.
- Simple design that will not rust compared to other similar products.
- Meets both OSHA and Canada OHS requirements for restraining devices on pipe and hose connections.
- Available in nylon and polyester. Call for pricing.

Hose Halter Selection and Use

When securing hoses and pipe connections, do not exceed the specified pressure ratings.

The length of *Hose Halters* are ordered as a flat length based on a value equal to 8 times the hose outside diameter (OD), plus the desired span or gap between the choke points and rounded up to standard sizes shown below.

Recommended for Use on the Following Pipe and Hose Inside Diameters										
Part Number	Length (in.)	Color	1/4"	1/2"	3/4"	1"	2"	3"	4"	6"
Hose Maximum Internal Pressure (PSI) at above hose ID										
HH122*	22"	O R A N G E	26,000	6,500	2,900	1,650	400	175	100	50
HH130	30"									
HH140	40"									
HH144	44"									
HH164	64"									
HH230*	30"		52,000	13,000	5,800	3,300	750	350	200	90
HH244	44"									
HH264	64"									
HH274	74"									
HH330*	30"	Y E L L O W	-	29,000	13,000	7,300	1,800	820	460	200
HH344	44"									
HH364	64"									
HH430*	30"		-	37,000	16,000	9,400	2,300	1,040	580	260
HH444	44"									
HH464	64"									

*Minimum Length

OSHA 1926.603(a)(10) states:
"Safety chains, or equivalent means, shall be provided for each hose connection to prevent the line from thrashing around in case the coupling becomes disconnected"

Note: For use on hoses of 1/2" ID and smaller, HH2 2-ply *Hose Halter* restraints are recommended for improved flexibility near the end section of the restraint.

ROUNDONE™ HOSE HALTER

The Heavy Duty Solution for Coupling Safety

Help protect your workers from injury and your equipment from damage when pipe or hose couplings fail under pressure.

RoundOne pipe and *Hose Halters*™ offer protection for a wide range of pipe and hose sizes and pressures. Suitable for use on pneumatic, water, and hydraulic pipes and hoses. Available sizes cover inside diameters from 1/2" through 8", with pipe/hose pressures up to 85,100 psi. Complies with OSHA, Canada OHS and Work Safe BC requirements for restraining devices on pipe and hose connections.

C = Length between Choke Points

What size do you need?

1. In the chart below, find the row for your **pipe/hose inside diameter (ID)**.
2. Read across the row of selected ID until you come to a **maximum hose pressure** that exceeds the maximum pressure that will go through your pipe/hose.
3. The appropriate halter part number for that assembly is at the top of that column.

Part Number	HHS3	HHS6	HHS9	HHS12	HHS15	HHS18	HHS24	HHS28	HHS36
Minimum Length	20"	20"	24"	36"	36"	36"	36"	36"	44"
Pipe/Hose ID	MAXIMUM PIPE / HOSE PRESSURE (PSI)								
0.50"	23,500	47,900	76,000	-	-	-	-	-	-
0.75"	10,400	21,300	33,700	42,600	53,100	67,400	85,100	-	-
1"	5,800	11,900	19,000	23,900	29,800	37,900	47,800	57,400	70,100
1.5"	2,600	5,300	8,400	10,600	13,200	16,800	21,200	25,500	31,100
2"	1,470	2,900	4,700	5,900	7,400	9,400	11,900	14,300	17,500
3"	650	1,300	2,100	2,660	3,300	4,200	5,300	6,300	7,700
4"	360	740	1,180	1,490	1,860	2,370	2,900	3,500	4,300
5"	230	470	760	950	1,190	1,510	1,910	2,200	2,800
6"	160	330	520	660	820	1,050	1,320	1,500	1,940
8"	90	180	290	370	460	590	740	800	1,090
Length Adder	0.3	0.6	0.9	1.2	1.5	1.8	2.4	2.8	3.6

What length do you need? Order halters by the flat length.

1. To determine the minimum length, add the outside hose diameter (OD) to the length adder (per chart), then multiply by 7 and add the minimum desired length between the choke points (C).
2. Round up to the next even 6" increment (42", 48", 54", 60", etc.).
3. Example: Your 1" ID hose carries 30,000 psi. Using the chart above, the first *Hose Halter* to exceed that rating is an HHS18. The OD of your hose is 1.5", and you want 16" between choke points. The calculation follows:

$(1.5 + 1.8) \times 7 + 16 = 39.1"$ (rounded up to 42"). The complete part number is **HHS18X42IN**.

$$\text{Minimum Length} = (\text{Hose OD} + \text{Length Adder}) \times 7 + C$$
