

Lightweight Protection for Wheeled & Tracked Equipment on Any Terrain

EXTREME DURABILITY, RAPID DEPLOYMENT

- ▶ Lightweight design enables rapid deployment with just two workers at 80 lbs per mat; integrated HandGrips and GripZones eliminate heavy machinery.
- ▶ Recycled HDPE eliminates rot, splinters, and warping that destroy wood mats; UV-stabilized, won't corrode like steel—zero maintenance, 100% recyclable.
- ▶ Compression Capacity = 100 tons. Bending and load distribution performance are subject to equipment loads and ground conditions.
- ▶ Dual-sided traction features multidirectional nubs for superior tire grip on one side, tracked-equipment surface on the other—optimal for any application.
- ▶ Elongated holes accommodate thermal expansion without creating trip hazards or connection failures; enables continuous roadways that stay aligned under traffic.
- ▶ Compression-molded thermoplastic performs reliably in extreme temperatures from arctic cold to desert heat; resists oils, fuels, and industrial solvents without absorption.
- ▶ Lifetime warranty.

COMMON APPLICATIONS & USE CASES

-  Utilities & Infrastructure
-  Construction
-  Events & Festivals
-  Connected Laydown
-  Landscaping Projects
